### MAIN FEATURES

- In May 1978 there were 249 industrial disputes involving 368,900 employees and resulting in a loss of 413,600 working days. These are the highest monthly totals of workers involved and working days lost since July 1976.
- The principal disputes involved metal trades employees in all States except Western Australia accounting for (73 per cent of all working days lost), waterside workers in four states and hotel employees in Victoria.

### EXPLANATORY NOTES

More detailed information about disputes appears in the quarterly bulletin *Industrial Disputes* (6322.0).

2. The statistics of industrial disputes are compiled according to the Australian Standard Industrial Classification (ASIC), described in the Bureau publication *Australian Standard Industrial Classification (Preliminary Edition)*, 1969, Vol. 1.

3. The statistics refer only to disputes involving stoppages of work of ten man-days or more. Workers involved include workers directly and indirectly involved in disputes. Workers indirectly involved are those thrown

out of work at the establishments where the stoppages occurred, but who are not themselves parties to the dispute. Particulars of some stoppages (e.g. those involving a large number of establishments) may have been estimated and the statistics therefore should be regarded as giving a broad measure of the extent of stoppages of work (as defined).

4. Stoppages of work occurring at different times and at different establishments, but having a common cause may be regarded as one industrial dispute. However, an industrial dispute occurring in more than one State is counted as a separate dispute in each State. Disputes not settled at the end of a year are included as new disputes in the figures for the following year. The monthly statistics refer to all disputes operative in the month, including those disputes that commenced in previous months. In Table 1 details of the number of disputes and workers involved are shown separately for disputes beginning in the month and for all disputes. Average days lost per worker involved on a monthly basis are not comparable with the yearly averages, because workers involved are included in each month in which they are involved in disputes, while they are counted once only for each dispute in the annual figures.

NOTE. Any discrepancies between totals and sums of components are due to rounding.
